Dobrushin contraction versus Theorem 1: current-round TV
Cheap talk · cycle · n = 10
δ = 0.963
Cheap talk · cycle · n = 20
δ ≤ 0.999
Cheap talk · complete graph · n = 10
δ = 0.942
Counts · cycle · n = 10
δ = 0.985
Counts · cycle · n = 20
δ ≤ 1.000
Counts · complete graph · n = 10
δ = 0.904

Theorem 1 (capped)
TV contraction: same summed local defects
TV contraction + exact joint one-step defect
Observed binned TV (50 runs)
Actions-only audit · Llama 3.1 70B · pointwise 95% whole-run bootstrap shading, fitted tables fixed
Estimated bound curves are not confidence certificates. Empirical gaps include sampling error; all bounds capped at 1.
